

Hello Everyone,

I am Arifa Ahmed, I am a student counselor and coordinator by profession. I have had the opportunity to assist many ambitious and talented students pursue their desired higher education by supporting them with university admissions and placement, matching them and directing them to quality programs at an affordable cost. It brings me great joy to see them all graduate successfully and become positive role models and contributing members of society.

I am currently privileged to be a part of the One Light Institute, envisioned and run by Sharmin Ahmed and a group of excellent and enthusiastic board members. Sharmin and I go back quite some time and I have seen this group grow and develop and become the wonderful organization it is today. I have participated in a number of One Light projects in Bangladesh such as the Peace and Conflict Resolution course, and also the Pre-Natal Awareness project and course.

I believe that this vision of peace, harmony and social awareness is very crucial in a greatly divided world. One Light is bringing that vision to so many people. So here I am to promote and contribute to this beautiful effort with my utmost sincerity.

Thank You

Love and Peace To All
